Change Password	No	No	No	No

NOTE:

* By activating the Pre Brewing function you switch to regulation of pre-infusion on / off times; unless otherwise stated required by the customer data sheet will not be modified.

** Activating the TCI function you switch to the adjustment of the PID parameters; unless otherwise stated required by the customer data sheet will not be modified. If is asked a F04 value (TCI models with PID controller) set up differently from the standard, the matching on the Aviator model is Ofs. Temp. Gr.
